

— GREEN ENERGY AUTONOMOUS SOLUTION

CONTAINWATT® COMMAND & CONTROL

**KC20 DEPLOYING 75 M²
OF PV PANELS (15 KWP),
30 KWH OF BATTERY,
THREE 25 M² TENTS**

**ASSEMBLED IN LESS
THAN ONE DAY**

** Depending on the operating site and quantity of materials*

Containwatt offers a wide range of highly mobile self-sufficient command control options from a stand-alone unit to a multi-module system. It meets many operational needs including :

- Emergency first response in disaster areas, situation assessment and initial coordination of field actions.
- Low logistic footprint actions in complex isolated areas (special operations and military forward post, mobile actions to support populations).
- Tactical and operational level military actions in national and NATO frameworks.

The solar powered electricity enables to self-sufficiently meet all site activity needs, in particular :

- HF, V/UHF, SHF semi-fixed or mobile transmitters/receivers
- Local intranet network with multiple staff workstations
- Operational situation screens and projectors
- UAV command posts
- UAV battery chargers and diverse tools
- Heat pump
- Lighting
- Refrigeration of foodstuff and small household appliances
